The EUROGIN HPV and Head & Neck Cancer Forum provides a platform for recent advances and ongoing research in HPV-associated head and neck cancers.

This year's program encompasses sessions on epidemiology and prevention, screening and treatment trial updates, molecular diagnostics and surveillance, innovations in personalized medicine including those leveraging artificial intelligence, and emerging developments in basic science, survivorship, and recurrent respiratory papillomavirus.

Thursday, February 11

I. Submitted papers I	8.00 - 9.30
II. Epidemiology and prevention of HPV+ head and neck cancers	9.30 - 11.00
III. Trial updates I: Screening / Early detection / Care delivery	14.30 - 16.00
IV. Trial updates II: Treatment	16.30 - 18.00
V. Submitted papers II	18.00 - 19.30

HPV and Head & Neck Forum

From early detection to survivorship: Advancing care in HPV-related head & neck cancer

Friday, February 12

VI. New biological insights into HPV+OPC (Integration, sinonasal HPV Faden, SNP data)	8.00 - 9.30
VII. Prognostic modeling and personalized treatment (Focus on AI)	10.00 - 11.30
VIII. Recurrent and metastatic HPV(+) OPC	11.30 - 13.00
IX. Living well after HPV-associated head and neck cancer: Survivorship and surveillance care delivery	14.15 - 15.45
X. Recurrent Respiratory Papillomatosis – Scientific and clinical updates	16.15 - 17.45
