## THANK YOU MESSAGE

On behalf of the EUROGIN Congress Chair and program committee, I would like to extend my sincere gratitude to all participants.

We have received dozens of messages of encouragement and appreciation for what has been described as an exceptional edition in Vienna. Over four intense, stimulating, and exciting days, this congress brought together a truly remarkable global community.

With more than 600 papers submitted from over 70 countries, the event provided a unique opportunity for researchers and clinicians in the field of HPV to share their experiences, present innovations, confront perspectives, and engage in meaningful discussions with their peers. Beyond the scientific richness, it was also a time to strengthen friendships, build

new collaborations, and foster human connections in a warm, welcoming, and inspiring environment.

For young researchers in particular, this congress represented a valuable platform to showcase their work and enhance the visibility of their contributions.

Once again, thank you all for your commitment, your enthusiasm, and your ongoing engagement in advancing our medico-scientific community. We look forward to continuing this journey.

We look forward to welcoming you again next year in Bologna for an even more engaging and inspiring EUROGIN edition.

**Joseph MONSONEGO**  
**Chairman of the Scientific Committee**

# ATTENDANCE BREAKDOWN

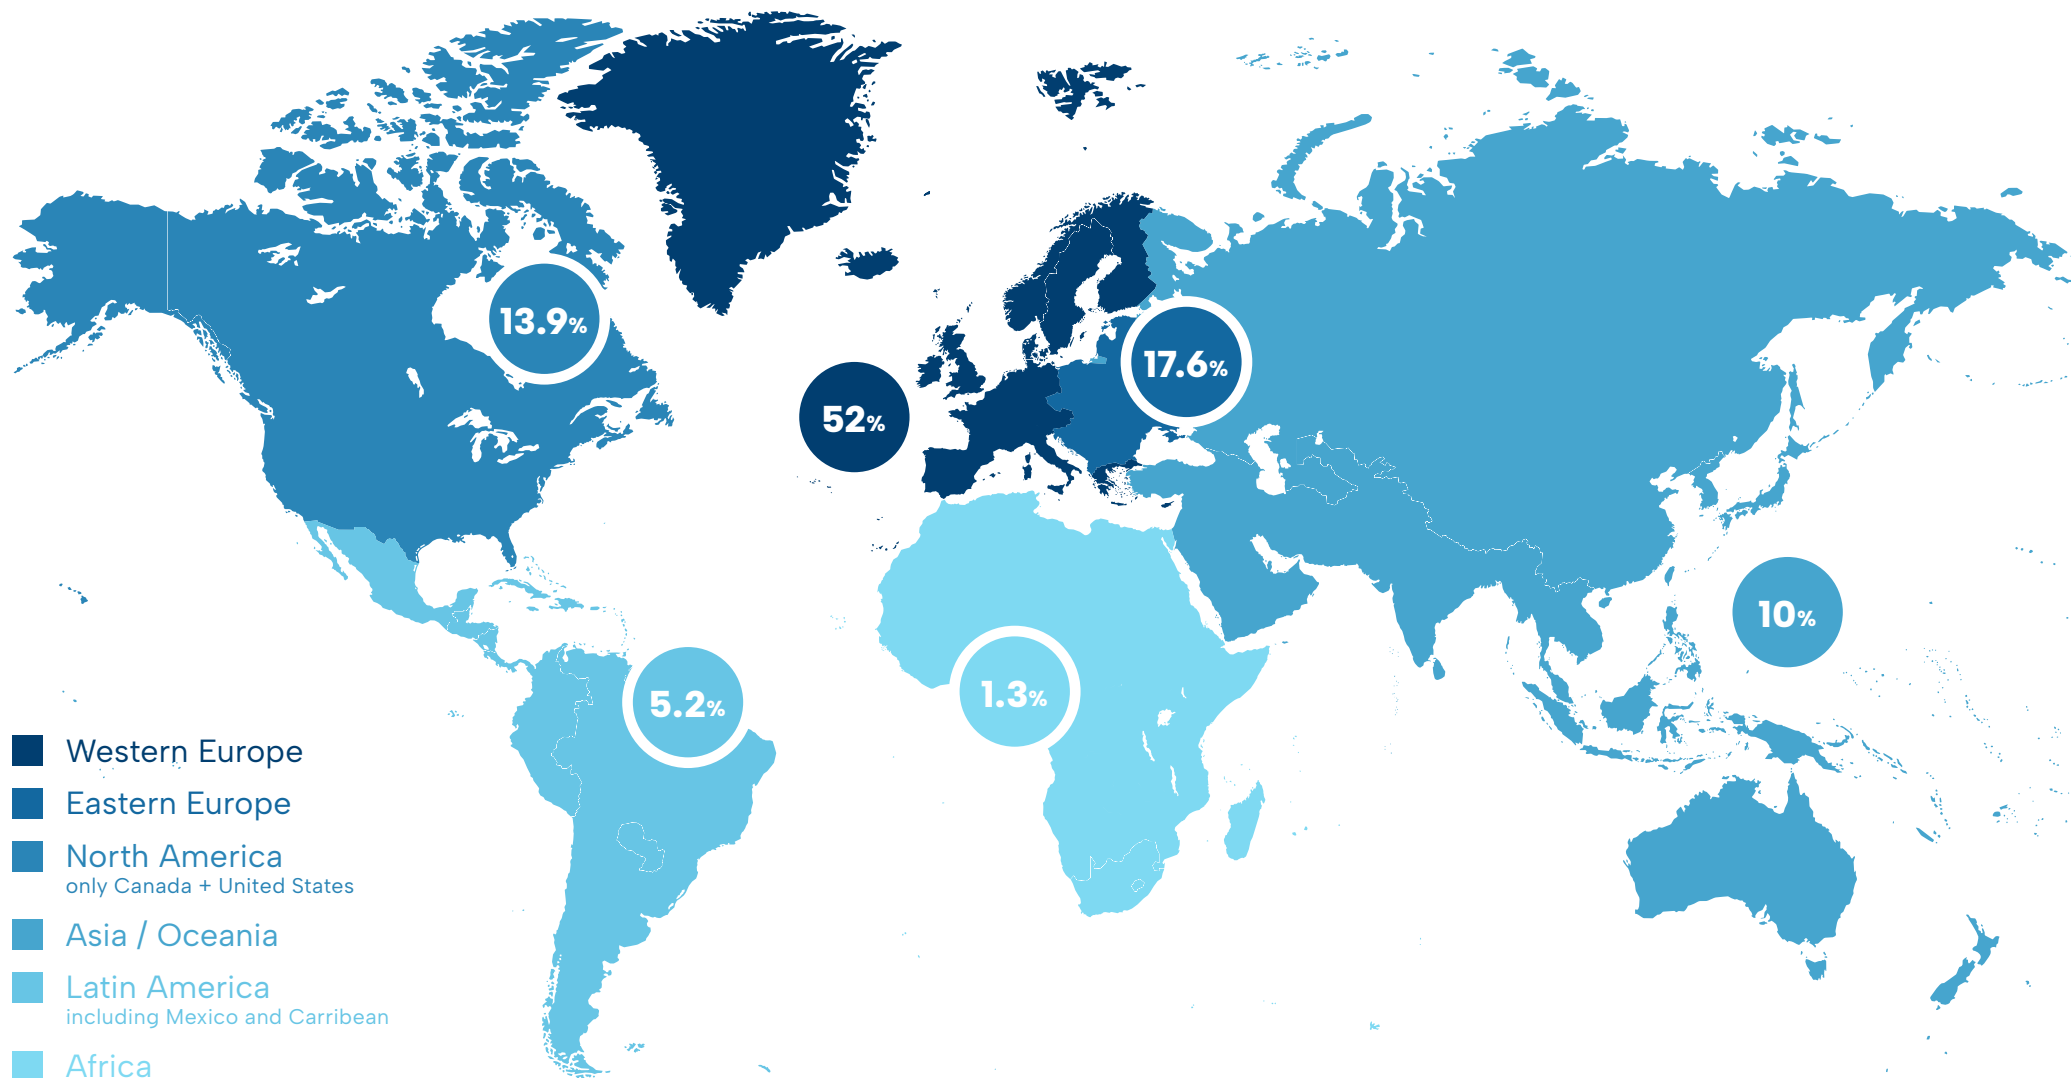

**1 622**  
registered participants

**89**  
countries

# GEOGRAPHICAL BREAKDOWN

# PROFESSIONAL PROFILES BREAKDOWN

**60%**

Health care professionals

**70%**

Gynecologists

**30%**

Other specialities\*

*\*Oncologists, Virologists, ENT specialists, Public health specialists...*

*\*\* Booth personel + scientific*

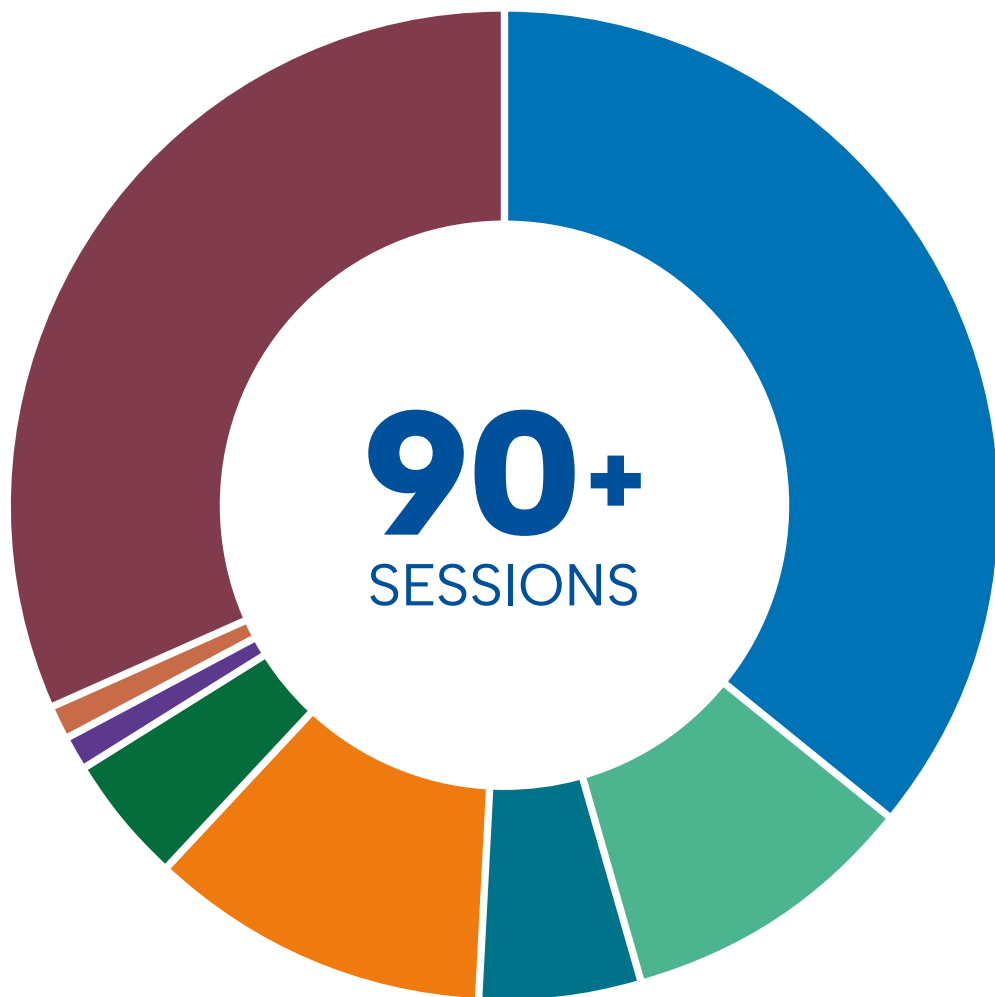

**10%**

Exhibitor staff\*\*

# PROGRAM STRUCTURE

## SESSION CATEGORIES BREAKDOWN

**33** Scientific Sessions

**9** Clinical Sessions

**5** Artificial Intelligence Sessions

**10** HPV & Head and Neck Forum Sessions

**4** Specialized Workshops

**1** Full-day German-speaking Workshop

**1** Full-day Central and Eastern Europe Workshop

**29** Free Communications Sessions

**103**  
Posters

**5**  
Industry Sponsored Satellite Symposia

# PROGRAM STRUCTURE

## INNOVATIVE PROGRAM FEATURES

### HPV and Artificial Intelligence Forum

In continuation from last year, the EUROGIN 2026 Congress included the HPV and AI Forum, in an upgraded and well attended format.

### HPV and Head & Neck Forum

The Forum on HPV and Head & Neck cancer has become a very well established program section at EUROGIN. The sessions, which extended over 2 days, covering a large array of aspects of HPV in head & neck cancer, were headed by outstanding international experts. This program part continues to attract a growing audience.

### Attendance of session types

The key topics of HPV vaccination and cervical cancer screening, covered by a variety of sessions addressing specific subthemes (self-sampling, methylation tests...) as well as clinical topics relevant for medical practice, attracted very high audience numbers.

Free communications sessions, which offered an additional high profile platform for sharing research findings, were also well attended, in particular those on clinical topics.

# PROGRAM STRUCTURE

## PRESENTERS & PRESENTATIONS BREAKDOWN

**664**

Speakers  
& Poster presenters

*including*

**259**

Faculty Members

**103**

Posters

**725**

Presentations

*These include presentations  
in the following sessions:*

*Scientific sessions, Clinical sessions,  
Specialized workshops, HPV and Head  
& Neck sessions, Free communications.*

*They do not include presentations  
in sponsored symposia.*

### EUROGIN GRANTS

The EUROGIN Organizing Committee awarded several grants for proffered papers submitted by young researchers and applicants from low-income countries.

All grants included free registration, and administrative support and several grants also covered accommodation and travel.

### SATELLITE SYMPOSIA

5 sponsored satellite symposia were organized by industrial partners at lunchtime or in the afternoon.

Attendance was generally very satisfactory with variations according to the topics and time slots. Most attendees at satellite symposia are highly motivated to learn about the data and experience offered.

## TESTIMONIALS

“

What a fantastic week spent at EUROGIN 2026! It was a pleasure to meet so many world-leading researchers and innovators! This was the first real opportunity for me to meet so many like-minded individuals who are as passionate in improving HPV-related cancer outcomes, and to hear their research presented was very inspiring and motivating! It was also very valuable to hear different approaches to HPV self sampling in cervical cancer screening, not only across Europe, but from around the globe. Very grateful to be involved in such a fantastic community!

”

“

Back home from Vienna after four intense and inspiring days at the EUROGIN Conference. For nearly a decade, this conference has been a key milestone in my professional journey — a place to stay updated, reconnect with colleagues and friends, and most importantly, build new meaningful scientific collaborations. Grateful for this experience and already looking forward to the next EUROGIN in Bologna in February 2027.

”

“

It was my first HPV-focused congress in quite some time, and it reminded me that science never stands still. From the integration of AI, to shifts in HPV genotype prevalence, and the growing importance of head and neck as well as anal cancers—EUROGIN 2026 was a powerful learning experience.

”

“

An outstanding congress, as always. Grateful to have contributed and leaving inspired, with new ideas, collaborations, and projects ahead. Looking forward to next year!

”

“

There's something special about being surrounded by people who are so passionate about improving cancer screening, prevention and early diagnosis - it's energising, motivating, and a great reminder of why this work matters.

”
