China Workshop

Pioneering the era of integrated management for lower genital tract and anal precancerous lesions

Thursday, February 11 • 16.30 - 18.30

Coordinators

Long Chui
China

Yun Zhao
China

I. Introduction 16.30 - 16.35
Long Sui (China)

II. Innovating cervical cancer screening with point-of-care HPV testing in China and its potential value for LMICs 16.35 - 16.45
Fanghui Zhao (China)

III. Multidisciplinary management of HPV-related diseases 16.45 - 17.00
Lihui Wei (China)

IV. Impact of colposcopy-directed biopsy on the management of cervical intraepithelial lesions in pregnant women 17.00 - 17.10
Yun Zhao (China)

V. DNA methylation in cervical cancer and precancerous lesions: From mechanistic studies to clinical risk stratification 17.10 - 17.20
Mingzhu Li (China)

China Workshop

Pioneering the era of integrated management for lower genital tract and anal precancerous lesions

VI. HPV integration testing: A novel strategy for the management of CIN2 lesions 17.20 - 17.35

Nan Yu (China)

VII. Understanding the immune microenvironment post HPV infection and its clinical applications 17.35 - 17.45

Pengming Sun (China)

VIII. Efficacy, acceptability and safety of laser ablation for cervical high-grade squamous intraepithelial lesions: A multicenter randomized controlled trial 17.45 - 18.00

Jinhui Wang (China)

IX. AI-assisted precise diagnosis of vulvar diseases to break through dilemmas 18.00 - 18.10

Qing Cong (China)

X. Progress and experience in phase 3 clinical trials of the 9-valent HPV vaccine for Chinese men 18.10 - 18.20

Long Sui (China)

Discussion and Q&A 18.20 - 18.30
